Experience

Capgemini
April 2024 – Present

Professional-I Software Engineer (Golang, MongoDB, Docker, Azure cloud) — *Gurgaon, Haryana*

- Designed and implemented backend services for the **IMEC project** using Golang, ensuring scalability and high availability.
- Planned and executed the entire backend architecture using **Golang**, including database schemas, APIs, and system integrations, reduced **API latency** by 20% via optimized query handling and **MongoDB indexing**.
- Containerized applications using **Docker**, streamlining deployment and ensuring consistency across environments.
- Implemented **Azure Service Bus** integration for asynchronous communication and event handling using topics and managed identity authentication.
- Demonstrated strong **troubleshooting and debugging** skills, reducing system downtime by 25%.
- Proactively participated in code reviews and mentorship programs, fostering a culture of continuous improvement and collaboration, resulting in a 40% boost in **code quality metrics**.

Capgemini
April 2023 – Mar. 2024

Associate-II Software Engineer (Golang, Gorilla Mux, Docker, MongoDB) — *Gurgaon, Haryana*

- Participated in the **IMEC** and **EaaS** projects as a Backend Developer, specializing in **web services** development using Golang(Go) and **Swagger2.0** for API construction.
- Worked in **Agile sprints** with a focus on test-driven development and iterative delivery.
- Managed MongoDB for device inventory while leveraging Redis to reduce query time by 30%.

Capgemini
Sep. 2021 – Mar. 2023

Associate-I Software Engineer (Golang, OpenAPI/Swagger, MongoDB) — *Gurgaon, Haryana*

- Contributed to the 'Edge as a Service' project with a focus on backend service development using Golang.
- Engineered and maintained **microservices and RESTful APIs** within a **distributed architecture**, achieving a 30% reduction in API response time through optimized query handling and performance tuning.
- Improved **unit test coverage** by 30% (line and branch) using **AltCover**, enhancing code reliability and enabling safer deployments.

Projects

Personal Project: Fintech Wallet Application (PayTM-Inspired)
Link

- Engineered a secure, **scalable microservices architecture** for a financial application using Node.js and React, reducing latency by 40% and improving transaction success rates by 15%.
- Implemented **JWT-based user authentication**, secure payment flows, and role-based access control (RBAC).
- Empowered backend functionality with **RESTful APIs** and efficient database management, leading to a 20% improvement in application performance metrics.
- Conducted comprehensive **testing and debugging** procedures, ensuring a 95% decrease in application downtime and providing users with a seamless experience.

Technical Skills

Programming Languages: Golang(Go), Python, JavaScript, HTML, CSS

Tools and Frameworks: Go Modules, Gorilla Mux, Express, Nodejs runtime, Git, GitHub, Gitlab, Azure DevOps, Docker(Container), OpenAPI/Swagger

Databases: MongoDB, PostgreSQL

Education

University Institute of Engineering and Technology
2017 – 2021

B.Tech *in Computer Science Engineering – (CGPA - 7.54)* — *Kurukshetra, Haryana*
