---

Professional Summary

Experienced Software Engineer specializing in full-stack development, blockchain technologies, and AI integrations. Proficient in JavaScript, TypeScript, Solidity, Node.js, React.js, .NET C#, and MongoDB. Demonstrated ability to develop secure, scalable software solutions, integrate blockchain components with modern web applications, and implement AI-driven features. Proven track record in enhancing transaction efficiency, deploying decentralized applications, and leading cross-functional teams to deliver innovative projects.

Education

Bachelor of Technology in Electrical Engineering
Krishna Institute of Engineering and Technology, Ghaziabad
Graduated: 2015

Professional Experience

Vissol Vassutech PVT LTD
Senior Blockchain Developer | Feb 2023 – Present

- Designed scalable APIs with Nest.js and Prisma, integrated with GraphQL for flexible data querying.
- Deployed and managed cloud-native applications on Azure using Terraform and Kubernetes, achieving 99.99% uptime.
- Integrated AI-driven features utilizing Azure AI and Gemini to enhance platform intelligence.
- Developed and maintained applications using WCF .NET C#, Boomi for seamless enterprise system integrations.
- Leveraged Firebase for real-time database management and user authentication, improving application responsiveness.

TWINSSET PVT LTD
Blockchain Developer | Apr 2022 – Jan 2023

- Configured Hyperledger Fabric networks on AWS, utilizing Docker and Kubernetes for efficient deployment.
- Developed and deployed secure chaincode in Golang, ensuring adherence to performance benchmarks.
- Implemented CI/CD pipelines, reducing deployment time by 40%.
- Enhanced blockchain network security and scalability through continuous monitoring and optimization.
- Led the **Layer 3 application layer** development for a variety of blockchain and enterprise solutions, ensuring robust UI/UX integration.

QWERTYCODE PVT LTD
Blockchain Developer | Jan 2021 – Apr 2022

- Designed and implemented Ethereum smart contracts using Solidity, ensuring secure transaction processing.
- Developed dApps with web3.js and Solidity, integrating IPFS for decentralized storage.
- Maintained blockchain nodes, ensuring high availability and performance.
- Collaborated with frontend developers to integrate blockchain functionalities with user interfaces.

- Led the Layer 2 scaling solutions development using Optimistic Rollups and Plasma to enhance Ethereum-based dApps, improving transaction throughput and reducing gas fees.

Techcospace PVT LTD
Web Developer | May 2019 – Jan 2021

- Developed responsive web pages using HTML, CSS, and JavaScript, improving page load times by 20%.
- Integrated RESTful APIs to enhance application functionality and user experience.
- Managed version control and deployments using Git and AWS, ensuring timely project delivery.
- Collaborated with designers and backend developers to implement cohesive and user-friendly interfaces.

Key Projects

Title-Direct
Backend Developer

Tech Stack: *Nest.js, Prisma, GraphQL, SQL, Azure, Kubernetes, Helm, Terraform*

- Developed backend services using Nest.js and Prisma for a real estate and mortgage advice platform.
- Implemented GraphQL APIs and managed SQL databases for robust data storage.
- Deployed applications on Azure using Kubernetes and Helm, automating deployments with Terraform.

DocVenture
Full Stack Developer
Tech Stack: *DocuSign API, Node.js, React.js*

- Implemented eSignature functionality within the DocuSign Agreement Cloud.
- Developed APIs for document management and electronic agreement processing.
- Ensured compliance with industry standards and enhanced user experience with a responsive interface.

Co-lending Platform
Blockchain Developer
Tech Stack: *Hyperledger Fabric, React.js, Node.js, MongoDB, Golang*

- Developed a decentralized application using Hyperledger Fabric and React for secure lending and borrowing.
- Implemented backend services with Node.js and smart contracts in Golang.
- Integrated MongoDB for robust data storage, enhancing transaction tracking and reporting.

Supply Chain Management System
Blockchain Developer
Tech Stack: *Hyperledger Fabric, Node.js, React.js, IoT Integration*

- Created a decentralized system with Hyperledger Fabric to track real-time temperature and location of vaccine shipments.
- Developed backend services with Node.js and integrated IoT devices for real-time data capture.
- Built a React-based frontend for real-time data visualization and user interaction.

NFT Marketplace
Blockchain Developer
Tech Stack: *Ethereum, Solidity, OpenZeppelin, React.js*

- Developed ERC721 smart contracts using Solidity and deployed the marketplace on Ethereum.
- Integrated OpenZeppelin libraries for security and optimized transactions to reduce gas fees by 20%.
- Enhanced user experience with a responsive React interface.

VRplaced
Full Stack Developer
Tech Stack: *AI Algorithms, Node.js, React.js, MongoDB, REST APIs, FireStore, GCP, FIrebase*

- Developed an AI-driven interview platform conducting initial interview levels using AI algorithms.
- Designed and developed both frontend and backend components, ensuring scalability and performance.
- Integrated various APIs for seamless operation and data management.

Dhanu Token
Blockchain Developer
Tech Stack: *Ethereum, Solidity, OpenZeppelin, ICO, Blockchain Explorer*

- Developed ERC20 token smart contracts with vesting, ICO, and IPO features using Solidity.
- Conducted ICO and facilitated IPO for public token trading.
- Managed token distribution, transfers, and liquidity on the blockchain.

Gaming Platform
Part-time/Freelance Developer
Tech Stack: *Next.js, Node.js, MongoDB, Firebase, Web3, Stripe API*

- Developed a gaming platform encompassing casino, betting, and sports games using Next.js, Node.js, MongoDB, and Firebase.

- Integrated web3 technologies, including Stripe, cryptocurrency payments, and digital wallets.
- Implemented secure user authentication and real-time data processing.

Car Renting Platform
Part-time/Freelance Developer
Tech Stack: *MERN (MongoDB, Express, React.js, Node.js), Stripe API*

- Developed a car renting platform using the MERN stack.
- Designed responsive frontend interfaces with React.js and optimized backend services with Node.js and Express.
- Integrated payment gateways and user authentication systems to secure transactions and user data.

Certificates

- The Complete JavaScript Course: From Zero to Expert! (Udemy)
- Node.js, Express, MongoDB & More: The Complete Bootcamp (Udemy)
- Go Programming Language (Udemy)
- Linux Administration Bootcamp: From Beginner to Advanced (Udemy)
- Linux Mastery: Master the Linux Command Line (Udemy)
- Cryptography: A Hands-on Approach (Udemy)
- IBM Blockchain Foundation Developer (IBM)
- Blockchain Essentials (IBM)
- Ethereum and Solidity: The Complete Developer's Guide (Udemy)
- Hyperledger Fabric 2.x Network Design & Setup (Udemy)
- Build an IoT Blockchain Network for Supply Chain (IBM)

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, Go, Solidity, C#, .NET

Blockchain Technologies: Solidity, Polygon, Truffle, Hyperledger Fabric, Ethereum, R3 Corda, Web3.js, OpenZeppelin, Solana, Cybersecurity, Cryptography

Web Development: Node.js, React.js, Next.js, Express, Nest.js, GraphQL, Prisma, REST API,UI/UX Design

AI & Machine Learning: Azure AI, Gemini,OpenAi, TensorFlow, PyTorch

Integration Platforms: Boomi, RESTful APIs

Database & Storage: MongoDB, PostgreSQL, SQL, Oracle, Firebase

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Git, Terraform, CI/CD Pipelines

Testing & QA: Chai, Mocha, Jest

Other Tools & Technologies: Agile, OOP, YAML, Consensus Algorithms, DeFi, NFTs, VS Code

Soft Skills

- Communication
- Team Collaboration
- Problem-solving
- Leadership
- Time Management

Interests

- Blockchain Technology
- AI Development
- Open Source Projects
- Gaming
- Cricket

Languages

English: Fluent**, Hindi:** Native
